

WELCOME

Pseudo Code

Explanation

It uses plain English combined with programming constructs to describe the steps.

Problem Statement

Sum of first N numbers

Write a program that calculates and displays the sum of the first N natural numbers.

Example

Pseudocode

Step - 1: Input N from the user

Initialize totalSum to 0

Step - 2: For each integer i in the range from 1 to N (inclusive):

a. Add i to totalSum

Step - 3: Print the value of totalSum

Code

Example

C++

```
int N;  
cin >> N;  
int totalSum = 0;  
for (int i = 1; i ≤ N; i++) {  
    totalSum = totalSum + i;  
}  
cout << totalSum;
```

Code

Example

Python 

```
N = int(input())
totalSum = 0
for i in range(1, N+1):
    totalSum = totalSum + i
print(totalSum)
```
