Template Layout

Feedback slide is added after every 4 sessions

Adding Title

Adding Title

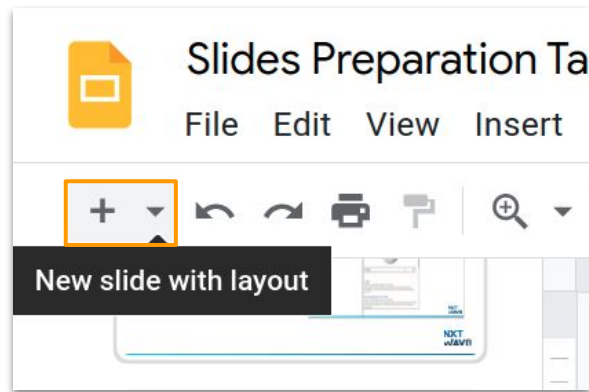

Click New Slide

Click on **New slide with layout (section header)** option to open the template slides.

Font size - 30 max

Font family - Montserrat medium

Font colour - #006daf

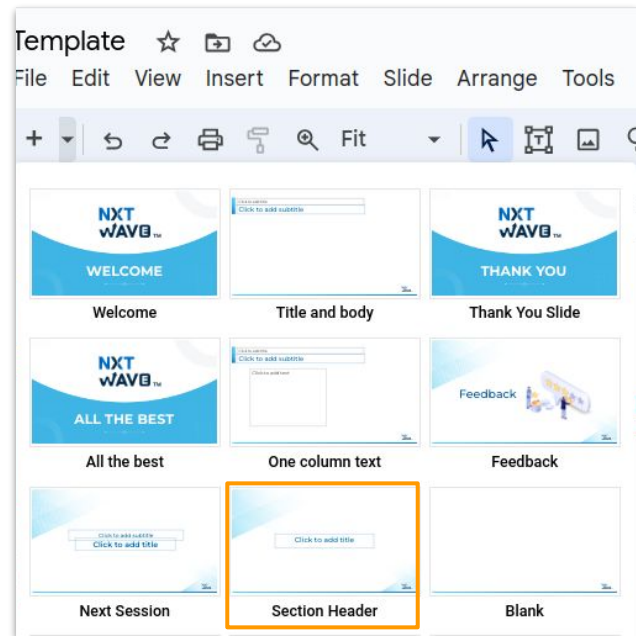

Note: Always paste using **Ctrl+Shift+V** so that you get the same format of the current space where you are pasting.

Adding Title

Select Section Header

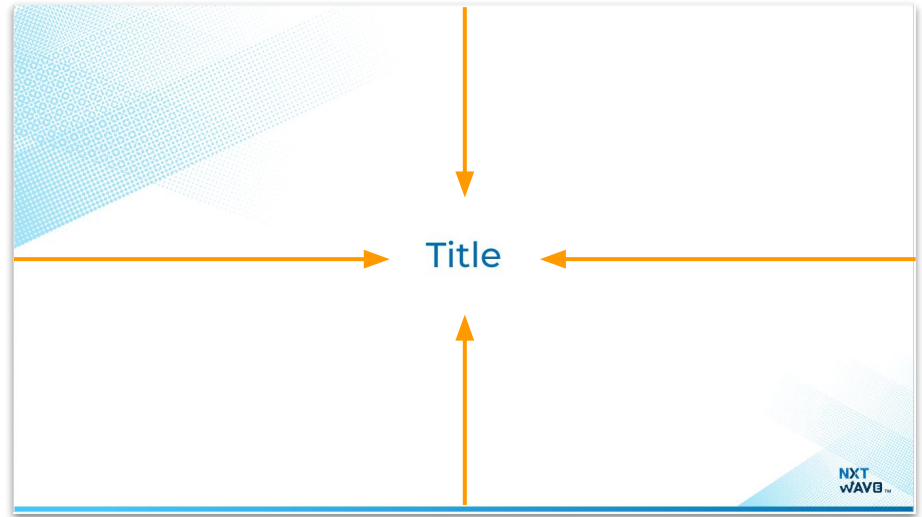

Select **Section Header** slide
to create a Title slide

Adding Title

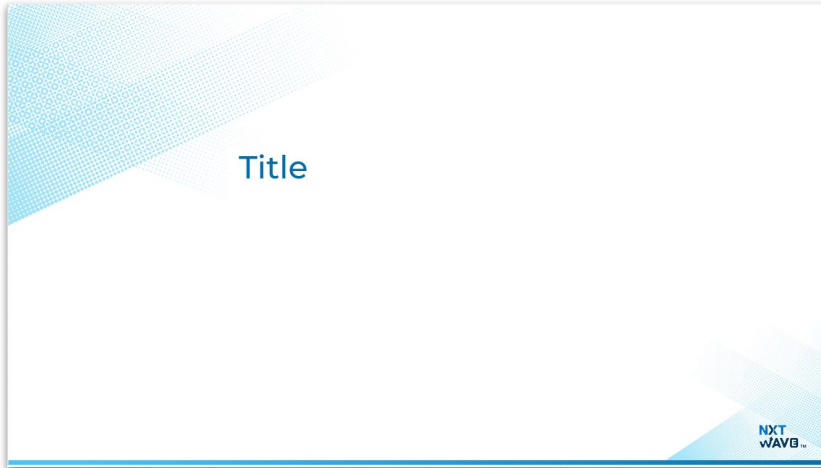

Title

Make Sure that **title** should
be in **Title Case**

Adding Title

Position of the Title

Adding Main Heading

Introduction

What is Effect Hook?

Adding Main Heading

Formatting

Introduction

What is Effect Hook?

font-size: 15px

font-family: Muli (normal)

color: #434343

Adding Main Heading

Writing Main Heading

Introduction

What is Effect Hook?

Every slide has a **clear heading**.

The heading should be the **main topic** that we are discussing

Adding Subheading

Introduction

What is Effect Hook?

Adding Subheading

Formatting

Introduction

What is Effect Hook?

font-size: 25px (min 22px)

font-family: Montserrat (medium)

color: #006daf

Adding Subheading

Writing Subheading

Introduction

What is Effect Hook?

Subheadings should be what we are going to explain in the particular slide

Adding Text in Slides

Formatting

font-family: **Montserrat (medium)**

font-size: **15px (min 12px)**

line-height: **1.5**

font-color: **#434343**

Maximum font size - 15

Minimum font size - 12

Testing Techniques

Grey Box

The tester has **partial access to the internal workings** of the software application.

This approach **combines** elements of both **black box** and **white box** testing

Adding Content in Slides

Adding Text in Slides

Try to adjust the content in 4 lines in a slide. The best case is 3 lines.

If not, the text lines can go till 5 lines

Note: Always paste using Ctrl+Shift+V so that you get the same format of the current space where you are pasting.

Array Methods

findIndex()

This method returns the **index** of the **first item** that satisfies the provided **testing function**

If no item found returns **-1**

	5	12	8	130	44
Index →	0	1	2	3	4

Adding Code Snippets

Code

HTML

```
<!DOCTYPE html>
<html>
  <head></head>
  <body>
    <h1 type="heading">Hello World</h1>
  </body>
</html>
```

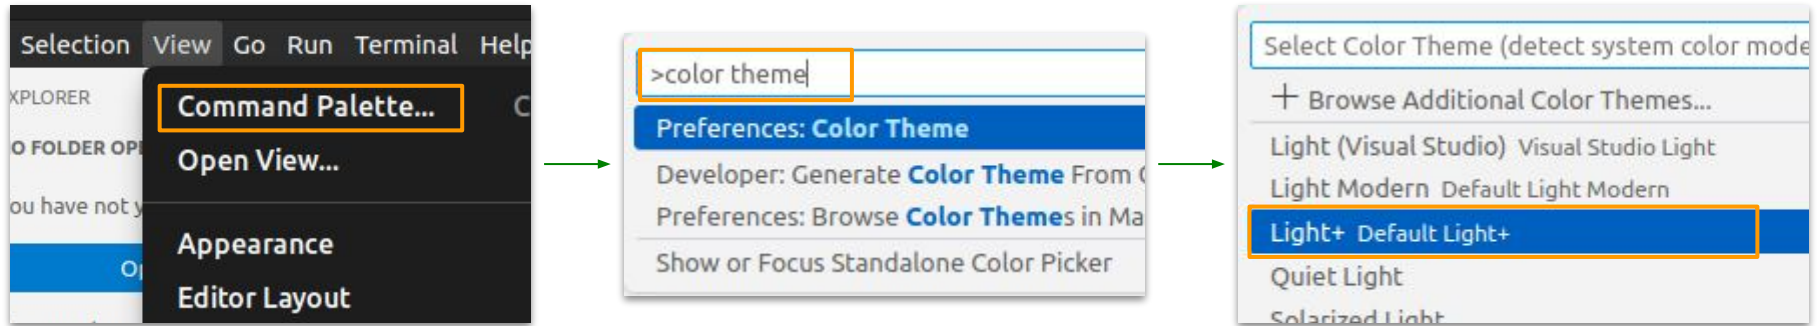

Copy the code from [VS Code](#)

Test the Code Snippets in the
[CCBP IDE](#) and then add it

Adding Code Snippets

Color Theme

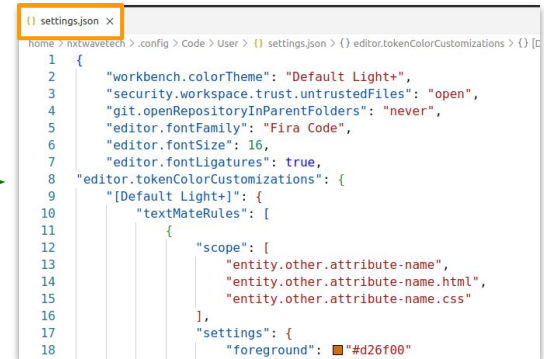

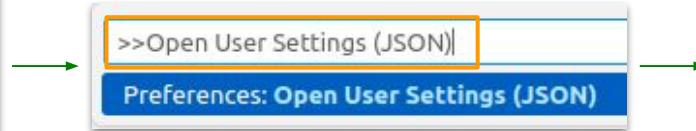

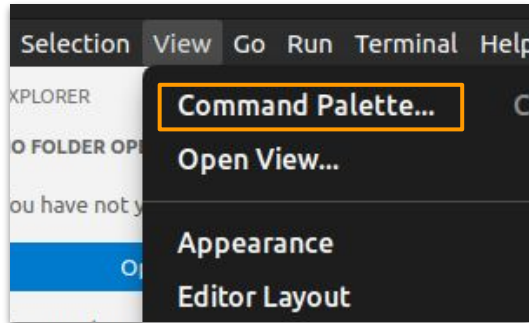

VS Code → View → Command Palette → In search bar, write “color theme” → Click on “Preferences: Color Theme” (Make sure that VS Code color theme should be Light+)

Adding Code Snippets

Adjusting formatting using VS Code Settings

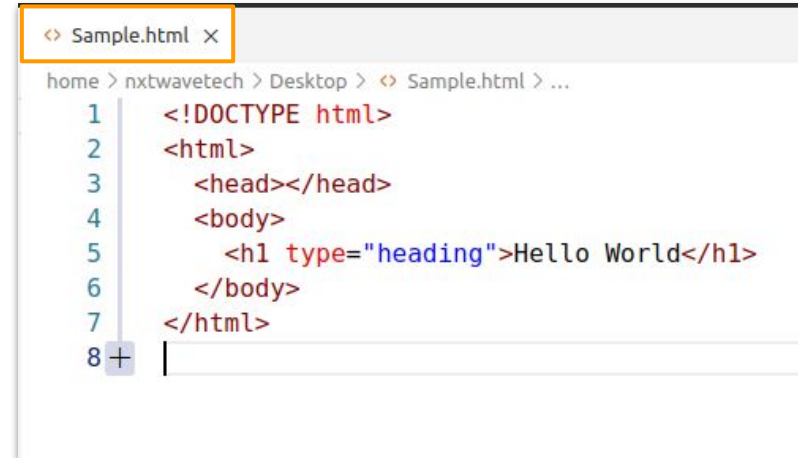

VS Code → View → Command Palette → In search bar, write “Open User Settings (JSON)” → Click on “Preferences: Open User Settings (JSON)” → Update the code
(Code given speaker notes)

Adding Code Snippets

Saving the file in VS Code

To get the desired format for every type of code like python, html etc. save the file with the required extension. Now paste the code in VS studio and you will get the desired format

The screenshot shows the Visual Studio Code editor interface. At the top, a tab is labeled 'Sample.html' with a close button. Below the tab, the file path is displayed as 'home > nxtwavetech > Desktop > Sample.html > ...'. The main editor area contains the following HTML code, which is syntax-highlighted:

```
1 <!DOCTYPE html>
2 <html>
3   <head></head>
4   <body>
5     <h1 type="heading">Hello World</h1>
6   </body>
7 </html>
```

 The line numbers 1 through 7 are visible on the left side of the editor. At the bottom of the editor, there is a line number 8 with a plus sign and a vertical cursor, indicating the current position of the text cursor.

VS Code format

When you paste the code from VS studio code. It will come in this way.
So you need to format it with the formattings given in previous slides.

```
HTML
<!DOCTYPE html>
<html>
  <head></head>
  <body>
    <h1 type="heading">Hello World</h1>
  </body>
</html>
```

Adding Code Snippets

Adding new line of code/s

When new line of code/s is added, blue box should be used to add the new line of code

HTML

```
<!DOCTYPE html>
<html>
  <head></head>
  <body>

  </body>
</html>
```

HTML

```
<!DOCTYPE html>
<html>
  <head></head>
  <body>
    <h1 type="heading">Hello World</h1>
  </body>
</html>
```

Indentations in Code Snippets

Follow **two spaces** indentations
in the code snippets

HTML

```
<!DOCTYPE html>
<html>
  <head></head>
  <body>
    <h1 type="heading">Hello World</h1>
  </body>
</html>
```

Attribute Colors

When you copy from VS studio Code, the attribute colors will be in red. So you need to change colors to

#d26f00

HTML

```
<!DOCTYPE html>
<html>
  <head></head>
  <body>
    <h1 type="heading">Hello World</h1>
  </body>
</html>
```

Additional text for code

For any explanation within the code, use this box to add text

```
<!DOCTYPE html>
<html>
  <head></head>
  <body>
    <h1 type="heading">Hello World</h1>
  </body>
</html>
```

Moving an Object

For smaller movements -
Shift + arrow keys (→ ← ↓ ↑)

For movements -
Arrow keys (→ ← ↓ ↑)

Using Shapes & Icons

Using Shapes & Icons

When showing transitions from one state to another state use **green arrow**

Focus or Highlighting

Focusing on a Slide

While highlighting any part of code
use rectangle shape with **Orange**
(#ff9900) border

HTML

```
<!DOCTYPE html>
<html>
  <head></head>
  <body>
    <h1 type="heading">Hello World</h1>
  </body>
</html>
```

Focusing on a Slide

HTML

```
<!DOCTYPE html>
<html>
  <head></head>
  <body>
    <h1>Hello World</h1>
  </body>
</html>
```

HTML

```
<!DOCTYPE html>
<html>
  <head></head>
  <body>
    <h1>Hello World</h1>
  </body>
</html>
```

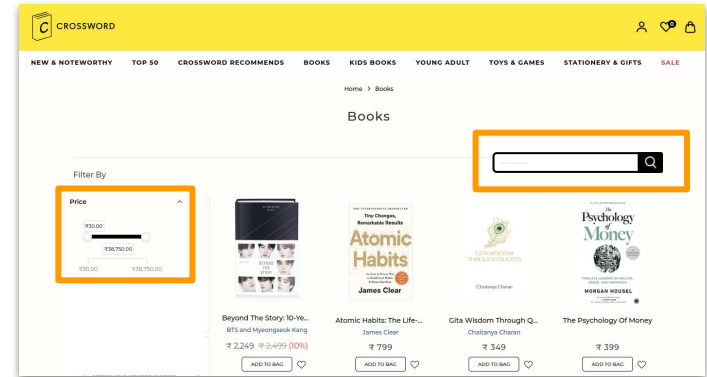

Make sure that you adjust highlightings properly observe
extra spacing in the above example

Highlighting an Object

Adding Content in Slides

Focusing on a Slide

Inside the image, if you want to highlight specific parts use orange colour. Only if it is required to focus on anything in an image or screenshot

Adding syntax

Adding Syntax in Slides

Formatting a syntax

Use this box for adding syntax. Text will be Fira code and formatting will be as per the VS code

For syntax

Adding Bullets

Focusing on a Slide

Numbered Lists:

Use this for step-by-step processes

To establish a many-to-many bi-directional relationship between Author and Book entities, we need to follow below steps:

1. Add a List of Author instances as an attribute in the Book entity
2. Add a List of Book instances as an attribute in the Author entity
3. Define the Many-to-Many relationship

Bulleted Lists:

Use this for explaining different types

Types of relationships:

- **One-to-One** Relationship
- **One-to-Many** Relationship
- **Many-to-One** Relationship
- **Many-to-Many** Relationship

Adding Speaker Notes

Adding Content in Slides

Adding Speaker Notes

Add **triggers** for the presenters like what they need to speak at that slide in speaker notes

Adding Content in Slides

Adding Speaker Notes

Update the speaker notes relevantly
while **duplicating slides**

Shortcuts

Shortcuts

Action	Shortcut
New Slide	Ctrl + m
Duplicate slide	Ctrl + d
Undo	Ctrl + z
Redo	Ctrl + y Ctrl + Shift + z
Copy	Ctrl + c
Cut	Ctrl + x
Paste	Ctrl + v
Copy formatting of the selected text or shape	Ctrl + Alt + c

Shortcuts

Action	Shortcut
Insert or edit link	Ctrl + k
Open link	Alt + Enter
Delete	Delete
Select all	Ctrl + a
Select none	Ctrl + Shift + a
Find	Ctrl + f
Find and replace	Ctrl + h
Paste formatting of the selected text or shape	Ctrl + Alt + v

Best Practises

Black Boxes

Place the **black box** in each slide and ensure that content in the slide **shouldn't overlap** with the Black Box

The image shows a presentation slide template. At the top, there is a title bar with the text "Click to add title". Below the title bar, there are two code editors. The first editor is labeled "CSS" and contains the following code:

```
let todoList = getFromLocalStorage();
...
function onDeleteTodo(todoId){
  ...
  let deleteElementIndex = todoList.findIndex(function (eachTodo){
    let eachTodoId = "todo" + eachTodo.uniqueNo;
    if (eachTodoId === todoId) {
      ...
    } else {
      ...
    }
  });
}
```

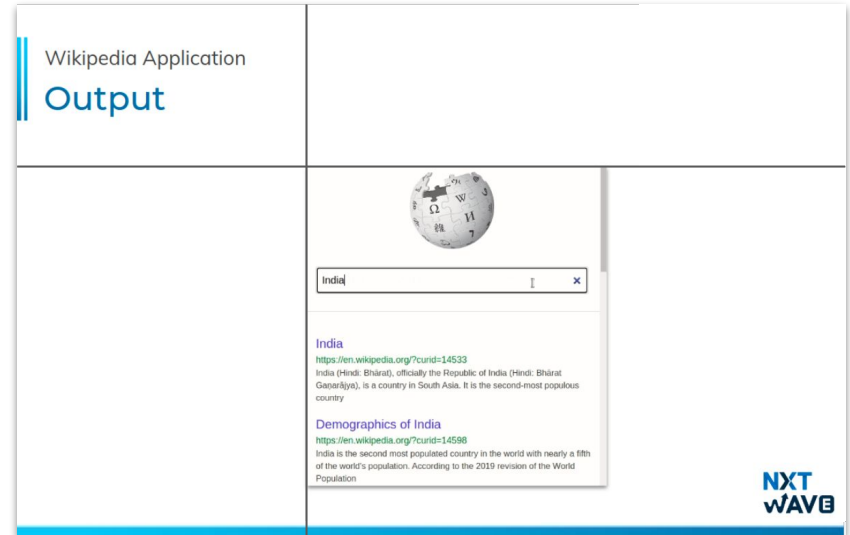

The second editor is labeled "JS" and contains the following code:

```
let todoList = getFromLocalStorage();
...
function onDeleteTodo(todoId){
  ...
  let deleteElementIndex = todoList.findIndex(function (eachTodo){
    let eachTodoId = "todo" + eachTodo.uniqueNo;
    if (eachTodoId === todoId) {
      ...
    } else {
      ...
    }
  });
}
```

At the bottom right of the slide, there are two logos: "XT WAVE" and "IB HUBS". A black box placeholder is located in the top right corner of the slide.

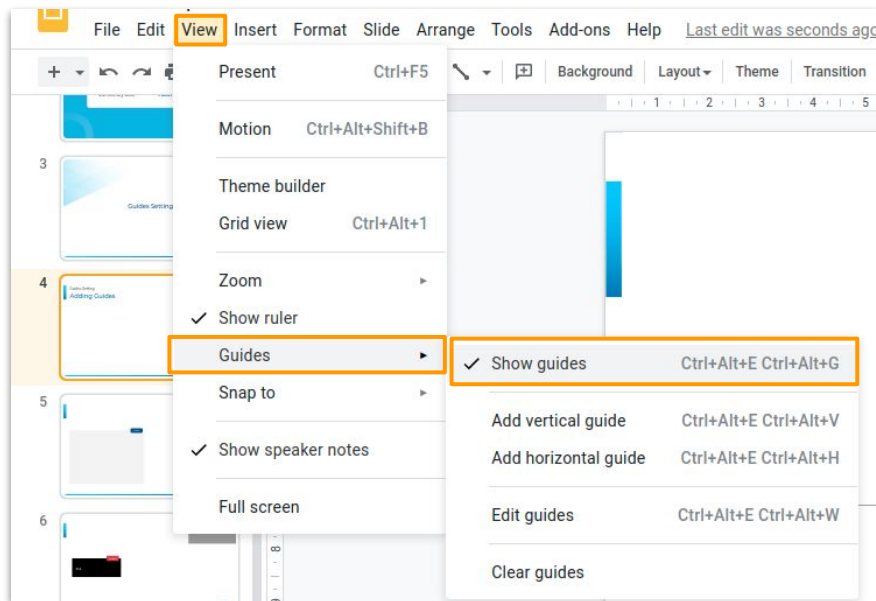

Guides Setting

Use guides to **place** images or
codes in slides at **fixed positions**

How to enable Guides

Click on **View**, select **Guides** and
Click on **Show guides** option
to display the guides

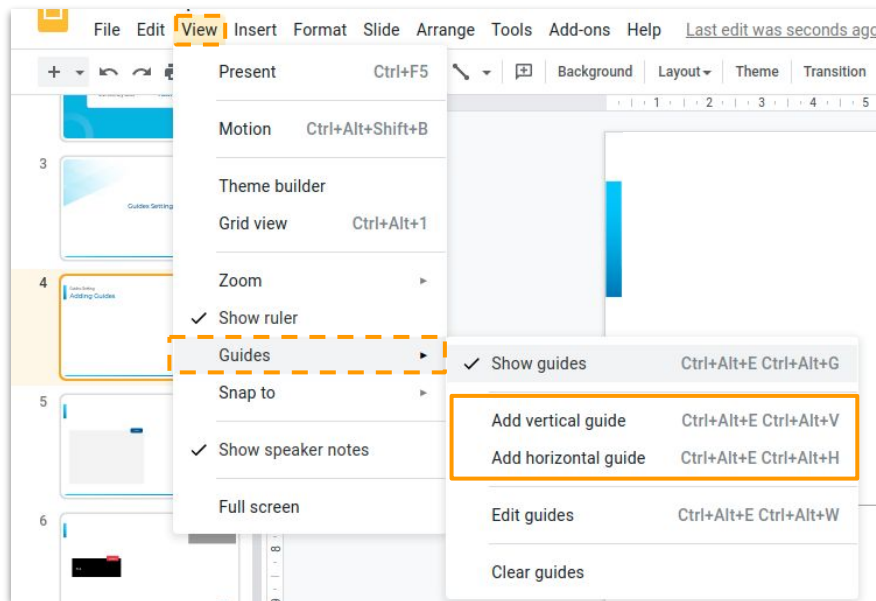

Guides Setting

Adding New Guides

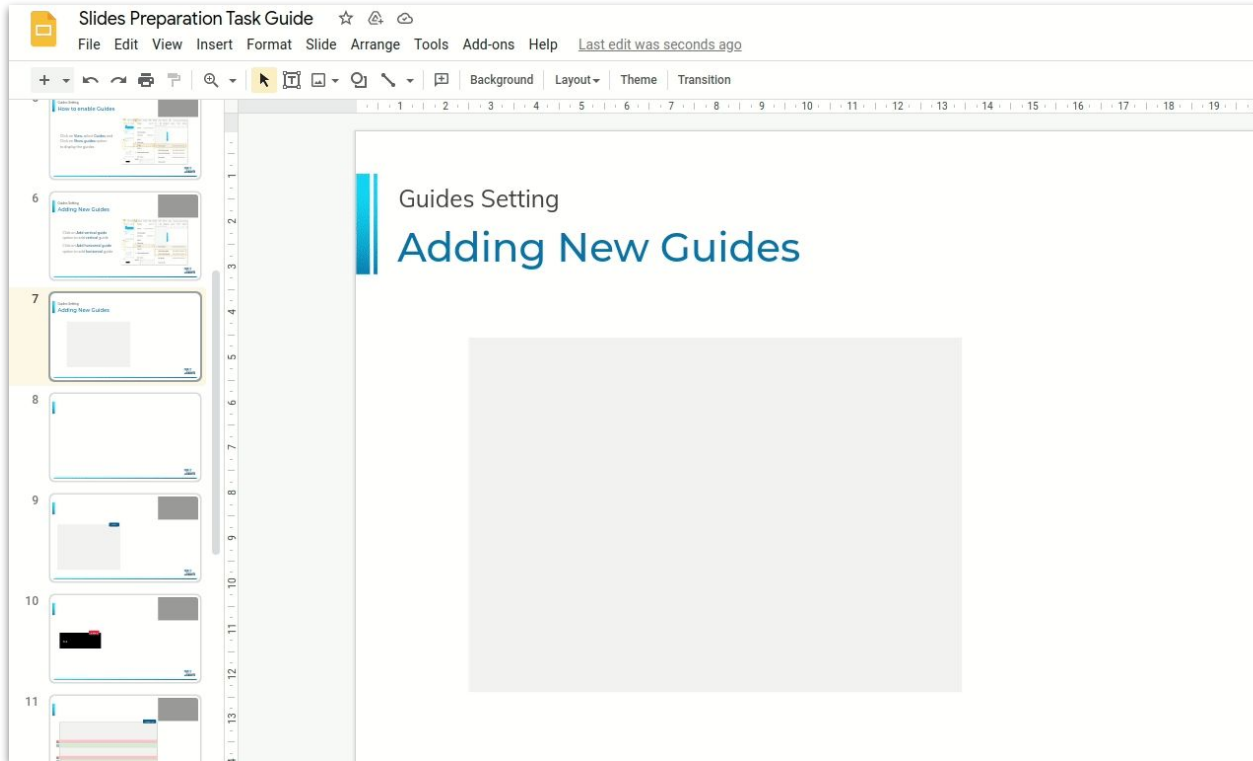

Click on **Add vertical guide** option to add **vertical** guide

Click on **Add horizontal guide** option to add **horizontal** guide

Guides Setting

Adding New Guides

Main Heading

Git Formatting

index.js

```
import { ... , BrowserRouter } from "react-router-dom"
...
const App = () => (
  <BrowserRouter>
    <Switch>
      - <Route exact path="/" component={Home} />
      + <Route exact path="/about" component={About} />
      <Route component={NotFound} />
    </Switch>
  </BrowserRouter>
)
```

If a statement/line in code is replaced with another statement use **git type formatting**

Assets Naming Convention

Assets Naming Convention

Images name should contain **-img** as prefix along with image name

For example **image-name-img.png**

Never Use Dark Red Color

Never use **dark red** color in slides

Use Dark **Orange** color(**#f79903**) in the place of red color

```
.h-center {  
  text-align: center;  
}
```

PROPERTY

VALUE

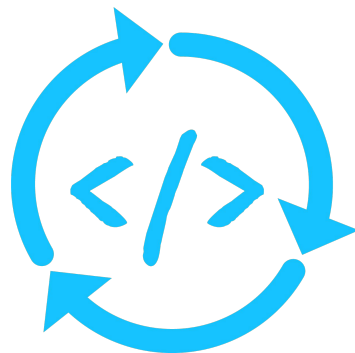

```
.h-center {  
  text-align: center;  
}
```

PROPERTY

VALUE

Using Highlighted Bullet Points

- ✓ Easy to **reuse logic** between the components
- ✓ **Components** become **simple** and **easy** to understand
- ✓ **Less lines** of code

Use **green color bullet points** writing points

Table

Formatting

Table

Column 1	Column 2	Column 3	Column 4

Syntax

```
<details>  
  <summary>heading text</summary>  
  Content  
</details>
```

Terminal Snippet font-family

Introduction to Node JS

Session Initial Setup

Introduction to Node JS

NotesCode PlaygroundDiscussions

Instructions

Complete the below steps to create your development environment and start working on some amazing projects!

Step - 1 : Setting up IDE (one time process)

Follow these instructions [Click Here](#)

🕒 If you have already finished step-1 before, skip this and continue directly to step-2

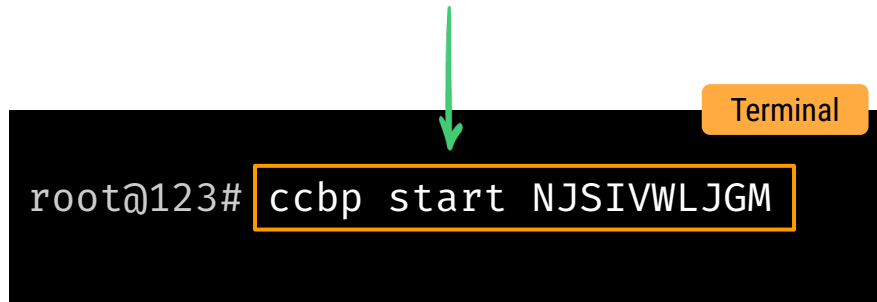

Step - 2 : Setting up a Workspace for your project

Run the below command in your IDE to setup a workspace for the project discussed in the session

```
ccbp start NJSIVWLJGM
```

COPY

While showing terminal in initial setup use font-family: **Fira code**

```
root@123# ccbp start NJSIVWLJGM
```

Terminal

Adding Illustrations and Images

HTML

```
<!DOCTYPE html>
<html>
  <head></head>
  <body>
    
  </body>
</html>
```

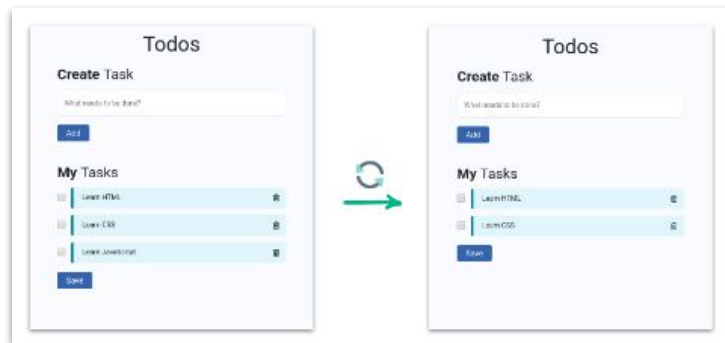

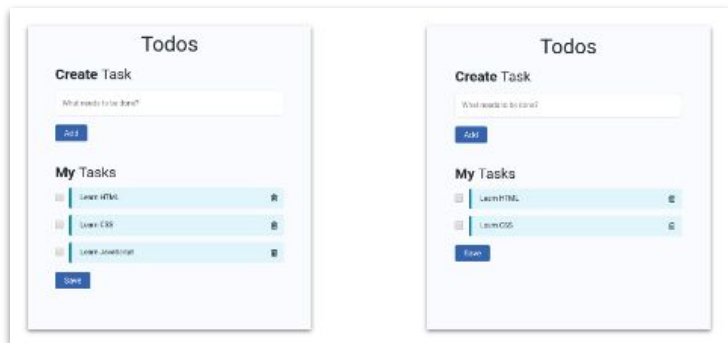

HTML

```
<!DOCTYPE html>
<html>
  <head></head>
  <body>
    
  </body>
</html>
```

If Image URL is large to adjust in the slide give **IMAGE_URL** as placeholder and put the image URL in the speaker notes

Adding Content in Slides

Using Shapes & Icons

Adding Color Boxes

Adding Color Boxes

Adding **color boxes** makes it easy to understand what color that the hex code represent

```
.heading {  
  font-family: "Roboto";  
  font-weight: 500;  
  font-size: 36px;  
  color: #2255cc;  
  text-align: center;  
  margin-bottom: 20px;  
}
```

CSS

#2255cc

Grammarly

Grammarly

Grammar Check

Always check for grammar before
sending it for final review

Recap

Recap

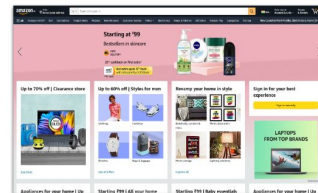

Include a recap slide to review what was covered in the previous session

Recap

Real-World Projects

Applications developed to **solve** the **problems** in daily life

Examples: Amazon, Netflix, etc

NXT
WAVE™

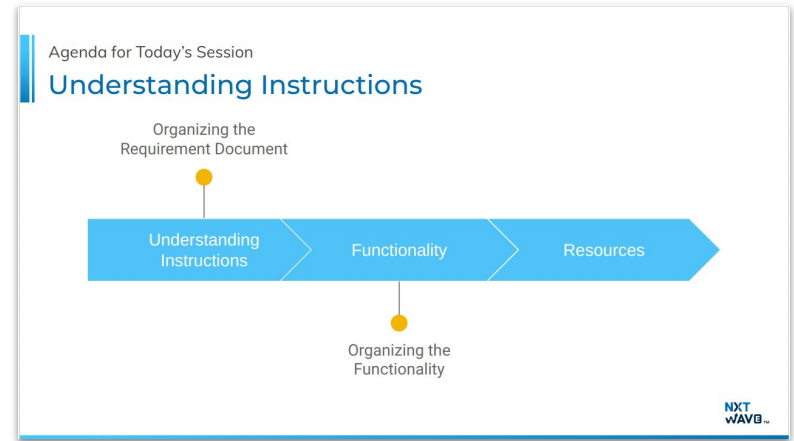

Recap

- Recap before agenda - When there is an immediate session before
- Recap after agenda - When the slides are there in any of the previous courses before

Agenda

Agenda

This should contain an outline of the session and cover all the major points that will be explained

Key Takeaways

Key Takeaways

Whatever is there in the agenda slide will be there in the key takeaways

For next form of bullet - Press Enter and then Tab

For going back to previous form of bullet - Press Enter and the press Shift first and then Tab

Exploring/Selecting Design Files

Key Takeaways

- ✔ Understanding Instructions
 - Organizing the Requirement Document
- ✔ Functionality
 - Organizing the Functionality
- ✔ Resources

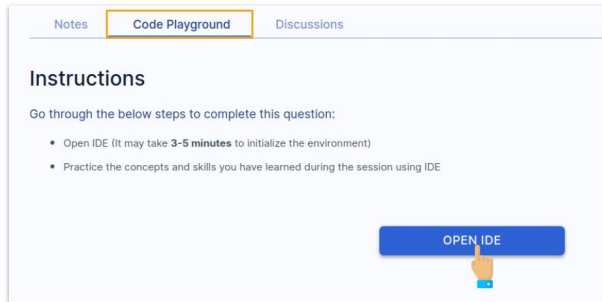

Other important details

Used when something needs to be clicked. It can be button, link, section etc.

Used when somethings needs to be pointed. It can be for image or text.

In JPA, **relationships** between the entities can be modeled in **two primary ways**:

1. **Uni-directional Relationship** 
2. **Bi-directional Relationship**

- 
1. Knowing the audience - if the audience have already seen how to represent array in a particular course then use the same format for familiarity
 - a. Ex: python - array representation used in js course as well
 - b. Ex: List word has to be used with caution for a person coming from a python background
 - c. Sometimes When we are displaying code output of console - Copy paste the output from the console being used by the learner for familiarity - advanced portal

Checklists

1. Formatting
2. Visuals
3. Grammar Check
4. Headings and Subheadings
5. Recap, Agenda and Key Takeaways
6. Title slides (Section)
7. Highlighting

Feedback
